Powerful Medicine.

That's what patients need when living with Pulmonary Arterial Hypertension (PAH). And that is what they will get when you refer them to Accredo Therapeutics, Inc.

As the only national provider of all three FDA-approved PAH therapies (Flolan®, Remodulin® and Tracleer™), Accredo Therapeutics' staff of clinicians has extensive experience and expertise in providing care for patients requiring these complex therapies.

When you choose Accredo Therapeutics to care for your PAH patients, you get more than just medicine. You get an array of services customized to the unique care needs of your patients, such as:

- Clinicians Focused and Specifically Trained in PAH Therapies
- Extensive Network of Local Pharmacies to Clinically Manage Patients
- National Customer Support Center Providing 24-Hour Access to Clinical Support for Patients, Family Members and Caregivers
- Specific Support Programs for PAH Patients
- A Team of Reimbursement Specialists to Assist with Insurance and Claims
