Program Announcement:

New Application Deadline: October 12, 2009 Resubmission Deadline: November 12, 2009

2010 Application Deadlines

New Application Deadline: February 12, 2010 Resubmission Deadline: March 12, 2010

Pulmonary Hypertension
Association (PHA)

National Heart, Lung, and
Blood Institute (NHLBI)

Jointly Sponsored

Mentored Clinical Scientist Development Award (K08) & Mentored Patient-Oriented Research Career Development Award (K23)

PURPOSE: K08

- To support the development of outstanding clinician research scientists in the area of pulmonary hypertension.
- To provide specialized study for clinically trained professionals who are committed to a career in research in pulmonary hypertension and have the potential to develop into independent investigators.
- To support a 3 to 5 year period of supervised research experience that integrates didactic studies with laboratory or clinically based research.
- To support research that has both intrinsic research importance and merit as a vehicle for learning the methodology, theories, and conceptualizations necessary for a well-trained independent researcher.

MECHANISM:

Awards in response to the program announcement will use the National Institutes of Health (NIH) K08 or the K23 mechanism.

FUNDING:*

The award will be funded by PHA and NHLBI and the K08 and/or the K23 will be awarded in 2009.

PURPOSE: K23

- To support career development of investigators who have made a commitment to focus their research endeavors on patient-oriented research.
- To support a 3 to 5 year period of supervised study and research for clinically trained professionals who have the potential to develop into productive, clinical investigators focusing on patient-oriented research in pulmonary hypertension.
- To support patient-oriented research, which is defined as research conducted with human subjects (or on material of human origin, such as tissues, specimens, and cognitive phenomena) for which an investigator directly interacts with human subjects.
- To support areas of research that include: 1) mechanisms of human disease; 2) therapeutic interventions; 3) clinical trials; and 4) development of new technologies.
