

PAH 09

The PHA Preceptorship Program

ANN ARBOR, MI | BOSTON, MA | DALLAS, TX | DENVER, CO | ROCHESTER, MN | SAN DIEGO, CA

Program Description

This one-day, highly interactive program will offer direct instruction on state-of-the-art PAH diagnosis, initial treatment, and comprehensive long-term management of patients with PAH.

Educational Objectives

The *PHA Preceptorship Program* is designed to instruct front-line clinicians in the highest quality of care for patients with PAH. At the conclusion of this program, participants should be able to:

- Define key pathophysiologic and epidemiologic components of PAH
- Accurately diagnose patients through comprehensive screening and early recognition of symptoms
- Evaluate the patient's condition and prescribe optimal long-term management, including knowing when and how to treat and when to consult with colleagues at an established PAH center
- Tailor comprehensive care for complex patient populations

Target Audience

This activity has been designed for pulmonologists, cardiologists, rheumatologists, internists, and primary care physicians, as well as nurses, physician assistants, and other allied health professionals who help care for patients with PAH.

“Our goal is to build links among community PAH specialists, non-specialists, and clinicians at established PAH centers that result in more meaningful collaboration. These new avenues for communication...can help us reach our ultimate goal...better care of our patients with PAH.”

Todd M. Bull, MD, FACP, Program Chairman

There is no fee for this program.

The University of Michigan Medical School will provide AMA Category 1 credit for this activity.

This activity is jointly sponsored by the University of Michigan Medical School and PHA.

Supported by unrestricted educational grants from:
